Nuclear Regulatory Commission  
Washington, D.C. 20555

Attention: Mr. Joseph M. Hendrie  
Chairman

Subject: Central Training Facility - Nuclear Power Generation

Gentlemen:

The nuclear power industry is currently assessing its approach to training operators and other personnel associated with nuclear power stations. The industry is acting aggressively on government concerns, as well as responding to community and citizen interests. Indeed, a number of companies within the industry are assuming full responsibility for training and for the construction of in-house simulators and technical schools.

Lester B. Knight & Associates, Inc. (Knight) has been selected by one of the major power companies to design a new nuclear power plant operator training facility.

Knight is a management consulting, architecture and engineering firm. Knight's management consultants are experienced in the planning and implementation of operation and maintenance and training programs for industry. Our architects and engineers are actively involved in the design of cost-effective, energy-efficient educational and training facilities.

We feel that Knight has information and expertise in the area of nuclear training facilities which would be of interest to you. We would be pleased to contact you soon to discuss how Knight may be of assistance to you.

Very truly yours,

LESTER B. KNIGHT & ASSOCIATES, INC.

Thomas V. O'Neill, P.E.
