EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

02 | The Brunswick Steam Electric Plant was informed by General Electric (GE) that the

03 | process computer was not using the correct fuel lengths for 8 x 8, 8 x 8R, and

04 | P8 x 8 fuel when calculating MTPF. MTPF is used to set the APRM gain and rod

05 | blocks. GE provided the software package for the process computer.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

10 | Plant procedures have been revised to correct the TPF reference value used when

11 | adjusting the gain of the APRM's. An alternate method for determining when APRM

12 | gains need to be adjusted that is not fuel-length related has been developed by GE,

13 | and a request for a Technical Specification change to include this method is being

14 | submitted.
