Re: Docket No. 50-133  
License No. DPR-7

Dear Mr. Engelken:

This is in response to your letter dated May 8, 1980 which transmitted IE Bulletin No. 80-11 concerning masonry wall design.

The plant is presently in the cold shutdown mode and will remain there until completion of the ongoing geologic investigation. The review, applicable testing, and resolution of any problems will be performed following completion of the geologic investigation; and a report of our findings will be forwarded prior to returning to power operation.

Very truly yours,

*Philip A. Greene, Jr.*
