Nuclear Material Safety and Safeguards
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

Re: License No. 42-15004-01E

Pursuant to Title 10, Code of Federal Regulations, Section 32.20, the information required with regard to total quantity of each isotope transferred under the license stated above is as follows:

<u>Date</u>	<u>Isotope</u>	<u>Amount</u>
July 1, 1979 through June 30, 1980	Iodine -125	None transferred

As noted in our previous report, due to product modifications, the microcurie content of our products has increased to a level which does not allow transfer to an exempt user.

Sincerely,

Robert D. Wurzel, Vice President
Regulatory Affairs and Professional Services
