Walnut Creek, California 94596

Re: Docket No. 50-133  
License No. DPR-7

Dear Mr. Engelken:

This is in response to your letter dated April 17, 1980, which enclosed IE Bulletin No. 80-09 concerning hydramotor actuator deficiencies. The Bulletin requested each licensee to determine whether any safety-related system or component in the facility uses an AH-90 or NH-90 series Hydramotor Actuator manufactured by ITT General Controls. A review has been completed and it has been determined that there are none of the subject actuators in use or planned for use in safety-related equipment in Humboldt Bay Power Plant Unit No. 3.

Very truly yours,

Philip A. Crane, 

CC: Director  
Office of Inspection and Enforcement  
Division of Reactor Operations Inspection  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555
