NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

JUL 23 1980

FCUP:RLS
70-1113
SNM-1097, Amendment No. 14

General Electric Company
ATTN: Mr. A. L. Kaplan, Manager
Licensing & Compliance Audits,
M/CJ26
P.O. Box 780
Wilmington, North Carolina 28401

Gentlemen:

In accordance with your application dated May 19, 1980, and pursuant to Title 10, Code of Federal Regulations, Part 70, three of the license conditions imposed by Amendment No. 11 to Special Nuclear Material License No. SNM-1097 are hereby amended as follows:

Condition 3 of Amendment No. 11, which concerns air sampling stations, is supplemented to require full compliance with its requirements by October 17, 1980.

Condition 4 of Amendment No. 11 is revised to require institution of the special air sampling within 30 days after receiving analytical results and to base the need for the program on the average of the quarterly results rather than on a monthly result.

Condition 5 of Amendment No. 11 is revised so that the uranium solubility analysis must be done only if the quarterly average airborne uranium concentration exceeds 3.45×10^{-15} $\mu\text{Ci/ml}$.

All other conditions of this license shall remain the same.

We agree that the examples of parameters important to a dose assessment change given in your letter of May 19, 1980, are typical but not all-inclusive.

FOR THE NUCLEAR REGULATORY COMMISSION

R. G. Page, Acting Chief
Uranium Fuel Licensing Branch
Division of Fuel Cycle and
Material Safety
