Mr. Richard Odegaarden
 Transportation Certification Branch
 Division of Fuel Cycle and Material Safety
 U. S. Nuclear Regulatory Commission
 Washington, DC 20555

Dear Mr. Odegaarden:

The Naval Facilities Engineering Command no longer has a need for Certificates of Compliance (COC) 5071, 5830 and 6786. The radioisotope thermoelectric generators (RTGs) covered by these Certificates have been transferred to other Navy commands as follows:

<u>Command</u>	<u>RTG</u>	<u>COC</u>	<u>License No.</u>
Naval Energy and Environmental Support Activity	URIPS-P1	5071	04-07316-03
	SNAP-21	5830	04-07316-03
Naval Support Force Antarctica	URIPS-P1	5071	04-19167-01
	SNAP-21	5830	04-19167-01
	URIPS-8	6786	04-19167-01

As you discussed with Lieutenant Bob Evans of the Naval Support Force Antarctica (NSFA) on 3 June 1980, it is requested that Certificates 5071, 5830 and 6786 be renewed and reissued to NSFA and that the Naval Energy and Environmental Support Activity, formerly the Naval Nuclear Power Unit, be registered as a user of Certificates 5071 and 5830. The complete addresses of these commands are:

Officer in Charge Naval Energy and Environmental Support Activity Radiological Affairs Support Office Port Hueneme, CA 93043	Commander U. S. Naval Support Force Antarctica FPO San Francisco 96601
---	--

The Officer in Charge of the Naval Energy and Environmental Support Activity and the Commander of the Naval Support Force Antarctica concur in this request.
