Dear Mr. Smith:

The attached letter regarding the addition to the pump room at Morris Operation is forwarded for your information. This addition at Morris Operation was discussed during our meeting of October 4, 1979.

Please call me if you have any questions.

Sincerely,

H.A. Rogers

SUBJECT: ADDITION TO PUMP ROOM AT MORRIS OPERATION

Gentlemen:

On October 4, 1979, a presentation to Leland Rouse and members of his staff was made by C.C. Herrington and H.A. Rogers of this office and T.E. Ingels of our Morris Operation. The purpose of the presentation was to inform your staff of a planned addition to the pump room at Morris Operation.

At the completion of the presentation, Mr. Rouse asked that a general description of the addition be furnished for the Staff's information. The description has been delayed to accommodate engineering changes in the design of the new structure. These changes are now complete and the general description is attached. After completion of the project, appropriate revision of *Consolidated Safety Analysis Report for Morris Operation*, NEDO-21326C, will be made to include a description of the new facility.

Please call H.A. Rogers (408\*925-6496) or C.C. Herrington (408\*925-6385) if there are questions about this project.

Respectfully,

GENERAL ELECTRIC COMPANY

  
D.M. Dawson, Manager  
Licensing & Transportation
