INVESTIGATIONS

Carlton Kammerer
Director, Office of Congressional Affairs
Nuclear Regulatory Commission
1717 H St. NW
Washington, D.C. 20505

Dear Mr. Kammerer:

Enclosed is a self-explanatory memorandum from my district office regarding the concerns of my constituent, Mr. Michael Dyar, about nuclear reactor safety.

As you will note, Mr. Dyar feels that safety is not receiving sufficient concern in the construction of nuclear reactors.

Your consideration of my constituent's concern, and any further information or comments you have, would be appreciated.

Sincerely,

ROBERT J. LAGOMARSINO
Member of Congress

REPLY TO
ATTN OF: D. Kelley

SUBJECT: Viewpoint

JUN 27 1980

TO: Montgomery K. Winkler:

Michael Dyar
461 N. M St
Oxnard, Ca. 93030

On subject of nuclear reactors, if it is possible to build a reactor to go into combat on military craft, that can go thru combat conditions and come out without any failures or ill effect to the crewmen, it should certainly be possible to build land reactors just as safely. He thinks that quality control portion of construction on land reactors should be investigated. It appears to him that there is money going into safety programs that is not being spent on safety and that too many shortcuts are being taken.

Re: federal budget. Thinks that if you look into the constitution you find the list of things the federal budget is supposed to be spent on. Any other expenditures should be made out of surplus funds.
