the right to dispute and object to the genuineness and completeness of any particular copy which any party may seek to use in this proceeding, if in fact that copy is not genuine or is not complete or has been altered in any way. The admissions made herein are without waiver of or prejudice to any other objections which General Electric may otherwise make to the relevancy, competency, or admissibility of any copy of the document.

2. General Electric admits that it has produced a document entitled "Spent Fuel Receipt and Storage at the Morris Operation," that the document bears the number NEDG-21889, that it was dated June 1978, and that a copy of this document is already in the possession of the General Electric Company. General Electric states that neither a genuine copy nor any other copy of the document was enclosed with Intervenor's "Request for Admission of Genuineness of Documents," so that General Electric must reserve the right to dispute and object to the genuineness and completeness of any particular copy which any party may seek to use in this proceeding, if in fact that copy is not genuine or is not complete or has been altered in any way. The admissions made herein are without waiver of or prejudice to any other objections which General Electric may otherwise make to the

relevancy, competency, or admissibility of any copy of the document.

Respectfully submitted,
