To whom it may concern:

I am writing this letter as a concerned family man and property owner at a residence approximately 7 miles from Three Mile Island.

I am not opposed to nuclear power. I am however, being a family man with a wife and two children, deeply concerned about the status and handling of certain situations regarding Three Mile Island.

I firmly believe Unit One should be activated. With the present energy conditions and costs it would be a definite local asset to be able to use the power this unit would supply.

In regards to unit two I don't think we should be so hesitant in going ahead and cleaning it up. It is just sitting and I am more concerned about the future health problems that might occur if this course of action is continued. It would make more sense to clean it up under proper supervision.

These are my thoughts and beliefs as a concerned citizen.

Thank you,
