J. B. Henderson, Chief, Reactor Construction Branch
Directorate of Regulatory Operations, Headquarters

CONSUMERS POWER COMPANY (MIDLAND UNITS 1 AND 2)
DOCKET NOS. 50-329 AND 50-330

The attached report of a routine inspection at the subject facility construction site on September 7, 1972, is transmitted for information. No items of noncompliance, nonconformance, or immediate safety problems were encountered during the inspection.

The purpose of the inspection was to determine the continuing adequacy of the licensee's program to protect components, equipment, and structures following termination of construction and facility "mothballing" in December 1970. In this regard, the licensee now expects Construction Permit hearings activities to proceed on a schedule such that construction may be resumed shortly after the first of the coming year.

A handwritten signature in cursive script, reading "W. E. Vetter", is positioned above the typed name.

W. E. Vetter, Chief
Reactor Construction Branch
