Irving Like, Esq.  
200 West Main  
Babylon, New York 11702

Dear Sirs:

By letter dated October 5, 1971 to Mr. Cherry and October 6, 1971 to Mr. Like, I informed you of the impending filing of five Babcock and Wilcox Company proprietary topical reports regarding its emergency core cooling system. B&W on October 6, 8 and 11, respectively, filed proprietary topical reports BAW-10030, BAW-10031 and BAW-10033. Because material previously described as being included in a report numbered BAW-10032 is not necessary nor being used in the present analysis of the emergency core cooling system, no such report has been filed. I enclose herewith a copy of BAW-10034 which contains multinode analysis of BAW 2568 Mwt nuclear plants during loss of coolant accident.

My letters of October 5 and October 6 requested that you indicate by your signatures and those of your technical experts that you would accept B&W proprietary reports subject to the protective order dated June 14, 1971 entered in this proceeding. I have received no replies from you regarding the previous letters, copies of which are attached hereto, and have therefore not forwarded to you copies of the proprietary reports which I previously offered. Upon receipt of your agreement to comply with the protective order in regard to the following

proprietary topical reports, I will be happy to mail them to you:

BAW-10030, "CRAFT - Description of Model for Equilibrium LOCA Analysis Program".

BAW-10031, "REFLOOD - Description of Model for Multinode Core Reflood Analysis".

BAW-10033, "Decay Heat Peaking".

Yours very truly,

/s/ John K. Restricker
