Nuclear Regulatory Commission
Washington, D.C.

Dear Sir:

Several of us as individuals and as citizen advocate groups have been intervening in utility cases trying to present the problems with nuclear power. Now Consumers Power is taking their appeal to the Supreme Court on the issue of whether nuclear plants pollute the environment too much to be allowed.

There is no way we can present our side of this and bring out the new facts that are developing without funds. Would your agency please allow funds to one of the intervening groups, Midland Intervenors, Mapleton Intervenors, Saginaw Intervenors, so that we can bring out these facts?

Thank you,

Martha Drake for
Saginaw Intervenors
