Gage-Babcock and Associates, Inc.
Attn: Mr. B. Cohn
135 Addison Avenue
Elmhurst, Illinois 60126

Mr. Cohn:

Enclosed is a copy of the Midland Nuclear Plants, Units 1 and 2, fire protection program evaluation. A cursory review of the submittal indicated that the Applicant has addressed Appendix A of our BTP-ASB 9.5-1 and; therefore, we find the submittal acceptable for review.

The Midland plant is an operating license application and; therefore, there will be a site visit. However, due to the early construction stage of the plant we will schedule our site visit sometime in the future between our first and second round questions. We would like your first round questions on the Midland fire protection submittal by January 15, 1978, in order to meet our present schedule. However, this schedule will be subject to change dependent upon the Midland stage of construction and our site visit.

Mr. W. T. LeFave is the reviewer for the Midland Nuclear Plants. If you have any questions, please contact Mr. LeFave or myself.
