F. L. CLAYTON, JR.
Senior Vice President

August 7, 1980

Docket No. 50-348

Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Mr. D. G. Eisenhut

Gentlemen:

RE: Letter from D. G. Eisenhut to All Pressurized
Water Reactor Licensees, Dated July 2, 1980

The referenced letter requested that Alabama Power Company propose technical specifications for category A lessons learned items for Farley Unit 1. The letter also requested proposed license conditions related to a system integrity measurements program and improved iodine measurements capability for Farley Unit 1. The above information was requested to be submitted to the NRC within sixty (60) days of receipt of the referenced letter.

Since Farley Unit 2 is scheduled to receive an operating license in September, 1980, Alabama Power Company plans to submit the requested Farley Unit 1 changes after the Unit 2 license is issued to assure that the same wording is used in both operating licenses and technical specifications.

If you have questions, please advise.

Yours very truly,

F. L. Clayton, Jr.
