Mr. Jay D. Ringenberg  
Chief, Permits and Enforcement  
Department of Environmental Control  
P. O. Box 94877, Statehouse Station  
Lincoln, NE 68509

Subject: Nebraska Public Power District  
Cooper Nuclear Station  
NPDES Permit No. NE 0001244

Dear Mr. Ringenberg:

This is a followup on my letter of July 18, 1980 concerning temperatures of the Cooper Nuclear Station discharge canal (Discharge 001) which were in excess of the 103 F limit.

Please be advised that no temperature noncompliances have occurred, to date, since July 16, 1980.

Inasmuch as the discharge temperature is dependent in part on the river temperature, we anticipate no further excess temperatures as long as river temperatures remain within the normal summer range.

If you have any questions concerning this matter, please contact me.

Sincerely yours,

L. John Cooper  
Environmental Manager
