

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

August 7, 1980

50-327  
50-328

MEMORANDUM FOR: Roger J. Mattson  
Director of Safety Technology  
Office of Nuclear Reactor Regulation

FROM: Edward S. Christenbury  
Chief Hearing Counsel  
Office of the Executive Legal Director

SUBJECT: FORM OF SEQUOYAH FULL POWER LICENSE

We have previously reviewed and worked with Jack Wetmore of your office in developing the Sequoyah full power license. We are continuing to work with the project management staff to assure that the license is supported by the safety evaluation and, contains those conditions and technical specifications required by that evaluation.

We have previously reviewed this proposed license and would make one additional change in the technical specifications, to have section 3.0.3 read:

When a Limiting Condition for Operation is not met, except as provided in the associated ACTION requirements, the unit shall be placed in a MODE in which the Specification does not apply, or by placing it, as applicable in . . .

Further, we continue to believe that the terms P-3, P-4, P-5, etc. should be defined or reference made to documents where the meaning of those notations appear.

We sincerely appreciate the cooperative efforts of Jack Wetmore in working to make this license a model from the points of view of clarity and enforceability as the Commission asked.

A handwritten signature in black ink, appearing to read "Ed S. Christenbury".

Edward S. Christenbury  
Chief Hearing Counsel
