Mr. Dan Gillen
U. S. Nuclear Regulatory Commission
7915 Eastern Avenue
Silver Spring, MD 20910

Dear Mr. Gillen:

During our telephone conversation of July 30, you requested two items of information pertaining to pre-operational inspections made by Mr. Steve Abt. The first item you requested was documentation that an independent engineer was on site during the liner installation on Cell 2. The second item pertained to density records on the sand drain for embankment No. 2.

I have referred this matter to Mr. Harold Roberts, Senior Project Engineer for the White Mesa Mill. Mr. Roberts will work with D'Appolonia in assembling the requested information, and will forward this information to you shortly. Meanwhile, if you should have further questions, or if the information does not appear to be forthcoming, please contact Mr. Roberts directly at the Denver office.

Sincerely yours,

C. E. Baker, Environmental,
Licensing & Safety Director
