February 11, 1980

Mr. Walter P. Haass, Chief
Quality Assurance Branch
Division of Project Management
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Haass:

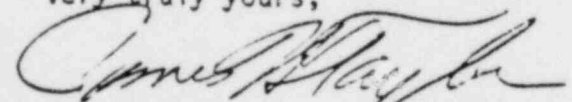

In compliance with the organizational change notification requirements of the NRC letter dated July 8, 1977, "Acceptance of Revision to Topical Report", we are providing the following information concerning organizational changes within the B&W Nuclear Power Generation Division.

On or about February 15, 1980, the Engineering Department organization shown in Figure 1-13 of B&W QA Topical Report BAW-10096A, Rev. 3, will change as shown in Attachment I. As a result of this change, certain responsibilities of Engineering Sections currently described in Section 1.1.1.2 of the Topical Report will be reassigned within the Engineering Department. In addition, the Integration function presently described in Section 3 of the Topical Report will no longer exist as a separate entity but rather its responsibilities will be distributed among the various Engineering Sections.

We have reviewed the organizational changes and find that they have no impact on the QA program commitments contained in our Topical Report. The re-assignment of Engineering responsibilities and the distribution of the Integration function are summarized in Attachment II. These organizational changes will be incorporated into the next revision of the QA Topical Report BAW-10096A, Rev. 3.

If you have any questions regarding these changes, please contact Mr. William B. Speight (Ext. 2902) of my staff.

Very truly yours,

James H. Taylor
Manager, Licensing
