Mr. Hendrie, (Excuse me, I'll direct
this to the most recent Chairman)

As a citizen living
approximately eighteen miles from
the Three Mile Island nuclear
plant (as the crow flies) I protest
to the NRC's proposal of venting
the gases in five days instead
of the previously proposed sixty
days.

I'm attempting to rear my
ten year old daughter in a wholesome,
clean environment and your proposal
threatens that attempt. I realise
since the "accident" we are guanine
pigs and victims, unable to control
our surroundings. I suggest you
~~considering~~ letting your family and
loved ones stay in Middletown during
the venting.

Actually, the sixty days sets
hard for me. I hate this whole,
horrible mess and don't trust the
people in the N.R.C., Med-Ed,
(over)

#

Governor Thornburgh; the list goes on.

Consider proposals please from the Union Concerned Scientist, one objective opinion.

May God be with you as you make decisions that will affect us all.

Peace,

Deborah R. Fetterman

P.S. A response would be nice.
