Dear Mr. Ahearne,

5-270

I feel there is much danger and damage which could result from venting the gases from the containment building at Three Mile Island, Pa. Please do not allow Metropolitan Edison Co. GPU to vent the krypton gas into the atmosphere.

The best move would be for the Island to be decontaminated and closed down. We've had enough.

8008190029

Respectfully,
(Mrs.) Doris G. Kreider
