Re: Application for License to Export  
Slightly Enriched UF6 and Slightly  
Depleted UF6 to Japan

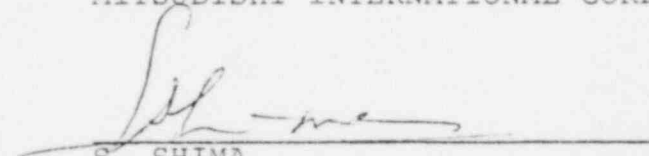

Gentlemen:

With reference to our application for License to export captioned material (Ref. No. HSA-6702-01/02/03 dated June 20, 1980) we would like to confirm that you advised us to issue one export license under our application no. HSA-6702-01/02, while as for depleted UF6 (Ref. No. HSA-6702-03) your advice was that no license is required to export such slightly depleted UF6.

In the meantime we highly appreciate your kind attention to arrange your issuance of above Export License in the earliest opportunity.

Very truly yours,

MITSUBISHI INTERNATIONAL CORP.

  
S. SHIMA
