

UNITED STATES NUCLEAR REGULATORY COMMISSIONDOCKET NO. 50-29YANKEE ATOMIC ELECTRIC COMPANYNOTICE OF ISSUANCE OF AMENDMENT TO FACILITY
OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 61 to Facility Operating License No. DPR-3, issued to Yankee Atomic Electric Company (the licensee), which revised the license and its appended Technical Specifications for operation of the Yankee Nuclear Power Station (Yankee-Rowe)(the facility) located in Rowe, Franklin County, Massachusetts. The amendment is effective as of its date of issuance.

The amendment deletes the technical specifications for secondary water chemistry and incorporates a new license condition in the license, paragraph 2.C(5), for implementation of a secondary water chemistry monitoring program which inhibits steam generator tube degradation.

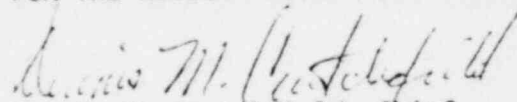

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR §51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated September 24, 1979 (Proposed Change No. 167), (2) Amendment No. 61 to License No. DPR-3, and (3) the Commission's related Safety Evaluation.
