EDWIN I. HATCH NUCLEAR PLANT UNITS 1, 2
ORGANIZATIONAL CHANGE

Gentlemen:

Pursuant to 10 CFR 50.90 as required by 10 CFR 50.59(c)(1), Georgia Power Company hereby proposes amendments to Plant Hatch Units 1 and 2 Technical Specifications (Appendix A to the Operating Licenses). The proposed amendments consist of revisions to offsite and unit organization charts. These revisions will reflect recent changes in Company organization and clarify Senior Reactor Operator (SRO) requirements for onsite personnel.

Attachment 1 contains a determination of amendment class for the proposed amendment. Attachment 2 contains the proposed amendment for Unit 1 and Attachment 3 contains the proposed Unit 2 amendment.

In addition to the Technical Specification revisions, we are including for information an organization chart which illustrates the division of responsibility between the two assistant plant managers. Minimum staffing requirements are shown as solid lines. Dotted lines represent current personnel in excess of minimum requirements.

We request your early review and approval of this administrative action.

Very truly yours,

W. A. Widner
