Nuclear Regulatory Commission  
Washington D. C.

Gentlemen:

I live 50 miles east of TMI - I do not want you to allow them to release that gas!

I live 2 miles west of Limerick Pa. nuclear power plant now being constructed. I do not want you to license them any further in view of their accident rate and poor construction record!

JUST WHAT IT WILL BE LIKE IF AND WHEN THEY DO GET OPERATING I SHUDDER TO THINK ABOUT!

My husband and I have always been peaceful, law-abiding, taxpaying citizens. We've looked forward to the time when we could retire and live out our years in peace and tranquility - but it doesn't seem as though we will be able to do so. You (the NRC), and our State PUC have taken our natural resources which belong to ALL OF THE PEOPLE and handed them over to the utilities who in turn have polluted our air and water for the benefit of a few stockholders. We don't need nuclear power at Limerick - they already have an oversupply of electricity (40% plus to be exact).

Gentlemen it's up to you - the future health of the USA and indeed perhaps the entire world depends on your decisions.

Please live up to your mandate - PROTECT THE PUBLIC!

Very truly yours,

*Blaine Glassmoyer*
