

April 3, 1980

To NRC.

Recently there was a large demonstration of seven thousand people to let you know they oppose nuclear power, namely TMI. I believe there are thousands more who are against TMI and you are soon going to hear the silent majority's voice. We can't trust Met Ed to tell us the truth. It's hard to realize that they are only interested in the almighty dollar. Doesn't anyone care about the people? And what about the contamination of the land? God did not create the earth and people to be contaminated.

Please care! Stop and think what we are leaving our children. It's difficult to believe

8008270234

that anyone cares, even the
government. I believe that continued
small amounts of radiation is
harmful to us and the land.

Please find a better way
to clean up TMI, and also
keep it closed. The stress of
this is still with us and would be
unbearable if it was reopened.
I also believe the Beach Bottom
plant should be closed, they are
in the paper every week with some
problem. I will pray that
God will help you make the
right decision.

A Concerned Citizen,
