

Portland General Electric Company

August 22, 1980

Trojan Nuclear Plant
Docket 50-344
License NPF-1

Mr. D. G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

On August 20, 1980, the NRC regional meeting was held in Chicago, Illinois, to discuss the functional requirements for emergency response facilities, including the Technical Support Center (TSC). At this meeting, members of the NRC Staff informed utilities that the implementation date of January 1, 1981 for the permanent TSC had been postponed until April 1982 and that the previous requirement for the upgraded TSC by January 1, 1981 is no longer applicable.

Based on this change in the NRC requirement, this letter is to inform you that the commitment made in the January 2, 1980 PGE letter for the upgraded TSC in the Viewing Gallery will not be implemented and that the TSC established in the Administration Building conference room will be maintained as an interim TSC until April 1982 when the permanent TSC is completed. Description of the conceptual design for the permanent TSC will be submitted to the NRC for review by the end of September 1980.

Sincerely,

C. Goodwin, Jr.
Assistant Vice President
Thermal Plant Operation and
Maintenance

CG/KM/4sa5A15

c: Mr. Lynn Frank, Director
State of Oregon
Department of Energy

Mr. Robert A. Clark, Chief
Operating Reactors Branch No. 3
