DOCKET NUMBER **50-289**
PROD. & UTIL. FAC.

To

The Honorable William F. Goodling
Room 109
Cannon House Office Building
Washington, DC 20515

Dear Representative Goodling:

As citizens of a historically proud and progressive nation, we wish to express our sincere concern in one positive manner. We believe nuclear energy is a vital and economical source of energy. The strength of our nation, industrially and economically, depends upon it. We support an aggressive program for the development of this resource.

Because we are most directly affected by the continued shutdown of Three Mile Island Unit 1, we strongly urge an immediate return to service of this valuable energy asset. Replacement power is costing each of us added, hard-earned dollars. The burden has fallen on us, as Metropolitan Edison customers, to pay for the delays as well as the valuable information being gained by the governmental agencies and the utility industry as a whole.

Please help get TMI-1 back into service now. Not only will it help relieve us of the financial burden, but it will be another step in helping our nation achieve energy independence.

Sincerely,

DS03
