Docket No. 50-440
Docket No. 50-441

The Cleveland Electric Illuminating
  Company
ATTN: Mr. Dalwyn R. Davidson
       Vice President - Engineering
P. O. Box 5000
Cleveland, OH 44101

Gentlemen:

The NRC staff is developing guidance for an acceptable method for providing
the emergency response facilities needed to implement the plans for coping
with emergencies that are required by paragraph 50.34 and Appendix E of
10 CFR 50. The proposed functional criteria for the Safety Parameter Display,
Technical Support Center, Emergency Operations Center and Nuclear Data Link
were recently published in NUREG-0696, "Functional Criteria for Emergency
Response Facilities." The staff is now soliciting public comment on these
proposed criteria and will hold three regional workshops for the purpose of
presenting and discussing the criteria, receiving comments and answering
questions. These workshops will be held from 8:30 a.m. to 5:00 p.m. at the
following locations:

August 19, 1980	Sheraton Valley Forge Hotel
	Valley Forge, PA
August 20, 1980	O Hare Hilton
	O'Hare International Airport
	Chicago, IL
August 22, 1980	Stadium Hotel
	Atlanta, GA

You are invited to send representatives from your company to participate in
these workshops. The subject areas to be discussed include the function of
the various parts of the facilities, the location, size, staffing and habit-
ability of the TSC and EOF's and the design criteria for the reliability,
separation and independence of data acquisition and display systems.

Cleveland Electric
  Illuminating Company

AUG 1 1 1980

Any questions you may have concerning these workshops may be directed to
Mr. Warren Minners, Office of Nuclear Reactor Regulation, Bethesda, MD.
at (301) 492-7581.

Sincerely,

for James G. Keppler
    Director
