EVENT DESCRIPTION AND PROBABLE CONSEQUENCES ⑩

[0][2] At 0730 on 7/23/80, diesel generator (D.G.) 1C was declared inoperable  
[0][3] when it failed to reach rated speed and voltage (13.5 seconds and 11.5  
[0][4] seconds respectively vs. 10+1 seconds required). Tech. Spec. 3.8.1.1,  
[0][5] in part, requires D.G. 1C to be operable. A similar occurrence was  
[0][6] reported in LER 80-043/03L-0. The health and safety of the public  
[0][7] were not affected.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS ㉔

[1][0] The cause for D.G. 1C failure to reach rated speed and voltage within the required  
[1][1] time is under continued investigation. This is the fourth LER reported since March  
[1][2] 31, 1980 on occurrences similar to this. The number of days between starts seems to  
[1][3] affect the start time. D.G. 1C will be started weekly until the cause is identified  
[1][4] and corrected. D.G. 1C was returned to service at 0745 on 7/23/80 following the \_\_\_\_\_
