AUG 6 1980

Westinghouse Electric Corporation
ATTN: Mr. Ronald DiPiazza, Manager
License Administration
Water Reactor Division
Pittsburgh, Pennsylvania 15230

Gentlemen:

In your letter, symbol WRD-LA-170 dated July 9, 1980, you describe certain decommissioning activities involving contaminated glove boxes and equipment. The procedures to be followed and the standards used for this work are not now described in your Fundamental Nuclear Material Control Plan. Since your license, SNM-1120, is for more than one effective kilogram of special nuclear material, these measurements and procedures must be approved by this office prior to shipment of these items.

Please prepare and submit these procedures for our review and approval in sufficient time to meet your shipping schedule.

Sincerely,

A handwritten signature in dark ink, appearing to read "J. Partlow".

James G. Partlow, Chief
Material Control and Accountability
Licensing Branch
Division of Safeguards
