DOCKET NO. 50-313

AUG 19 1980

Arkansas Power & Light Company  
 Attn: Mr. William Cavanaugh, III  
 Vice President - Generation &  
 Construction

P.O. Box 551  
 Little Rock, Arkansas 72203

Gentlemen:

During April and June 1979, your Company filed with the Office of Nuclear Reactor Regulation (ONRR) the following applications pertaining to the Arkansas Nuclear One - Unit No. 1 facility and made the fee determinations pursuant to 10 CFR 170 specified below:

1. Application dated April 24, 1979, relating to PORV setpoint change for which AP&L did not make a fee determination nor remit a fee, but requested that it be considered as part of the Cycle 4 operation approval amendment, and
2. Application dated June 6, 1979, relating to anticipatory reactor trip for which AP&L paid a Class III fee.

The ONRR staff has provided data which conclude that: (a) item 1 above involves a single safety issue and is considered to be a separate request from your Cycle 4 reload application; therefore, it requires a Class III fee of \$4,000, and (b) item 2 above is exempt from fees because it results from the USNRC's Order dated May 17, 1979.

This letter is to advise you of these fee determinations and to let you know that we are applying the fees submitted with item 2 to the application in item 1 rather than refunding \$4,000 and concurrently billing you for \$4,000. We deem this to be appropriate and less time consuming for all involved. If this does not meet your Company's approval, it is requested that this office be notified.

Sincerely,

Original Signed by  
 Wm. O. Miller

William O. Miller, Chief
