National Regulatory Commission;
Dear Sir;

My occupation is
Doctor of Dental Surgery -
or in Plain Words "Dentist".
I am 54 years of age and have
lived in York, Pa. all my life.

I Love My Country
"United States of America". I
am a Patriotic Citizen, but
I am very disturbed about
its future.

I ~~was~~ served
2 1/2 years during W.W. II as a
Radio Observer and Bombardier.

8009030 375

I also served 2 1/2 yrs
during the Korean War as a
dentist in the Air Force. I
will serve again if my
Country needs me.

Needless to say, I am
concerned with the T.M.I.
affair and the results it
is causing to the economic,
social life and mental well-
being of the local citizens.

The people of Central
Ga. are scared. They are
confused and we need some-
one to trust. They have been
told too many stories and lies.
They do not trust you (the
NRC). You have not

been honest to us.

You, Met-Ed and Babcock &
Willcox must share blame
in the mix-up. You the
N.O.C. should have had better
supervision and control of
nuclear energy plants. What
you allowed to happen here
gave nuclear energy a "Black-
Eye" forever.

But, we need nuclear
energy to supply electricity.
It is your duty to charge
all this.

You must take charge

of this T.M.I. situation,
Get the clean up job done
as safe as possible, but
not the cheapest way of
venting.

Alternative methods
must be used to eliminate
the gasses. Do not vent it
into the air. The residents of
the area have enough mental
suffering. Do not add this
fear to their minds.

Move your facilities into
the area where they would be
subjected to air pollution from T.M.I..

God Bless You in this
Serious Moment of our Lives. May
He give you the answers to our
problem. Sincerely Ken Hunt.
