400 Chestnut Street Tower II

August 29, 1980

TVA BFNP TS 140

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

Dear Mr. Denton:

In the Matter of the ) Docket No. 80-260  
Tennessee Valley Authority )

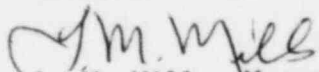

In accordance with the provisions of 10 CFR Part 50.59, we are enclosing 40 copies of a requested amendment to license DPR-52 to change the technical specifications of the Browns Ferry Nuclear Plant unit 2 (Enclosure 1). The proposed technical specifications reflect new primary containment atmospheric hydrogen monitoring instrumentation to be installed during the upcoming unit 2 refueling outage. Also enclosed are 40 copies of the system description and justification for the proposed changes (Enclosure 2).

These proposed changes are submitted as a supplement to those transmitted by my letter to you dated July 14, 1980 (TVA BFNP TS 140). We request approval of these proposed technical specifications by October 17, 1980, to avoid impacting the scheduled unit 2 startup date of October 24, 1980.

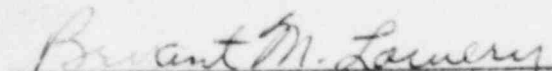

Based on the fact that the requested change is a supplement to BFNP TS 140, we do not believe that additional fees are appropriate and accordingly, none will be forwarded.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

  
L. M. Mills, Manager  
Nuclear Regulation and Safety

Subscribed and sworn to before  
me this 29<sup>th</sup> day of Aug, 1980.

  
Notary Public

My Commission Expires 4/4/82

Enclosure  
cc: See page 2
