SAFETY EVALUATION BY THE DIRECTORATE OF LICENSING

SUPPORTING AMENDMENT NO. 4 TO FACILITY LICENSE NO. DPR-38
CHANGE NO. 14 TO TECHNICAL SPECIFICATIONS;

AMENDMENT NO. 4 TO FACILITY LICENSE NO. DPR-47
CHANGE NO. 9 TO TECHNICAL SPECIFICATIONS;

AMENDMENT NO. 1 TO FACILITY LICENSE NO. DPR-55
CHANGE NO. 1 TO TECHNICAL SPECIFICATIONS;

DUKE POWER COMPANY

OCONEE NUCLEAR STATION, UNITS 1, 2 AND 3

DOCKET NOS. 50-269, 50-270 AND 50-287

Introduction

By letter dated August 19, 1974, Duke Power Company requested changes to the Technical Specifications appended to Facility Operating Licenses DPR-38, DPR-47, and DPR-55 for the Oconee Station. The proposed changes involve:

1. Title change within the station organization.
2. Changes to the station organizational chart.
3. Changes to the management organization chart.

Discussion

The proposed change would revise the following pages in the Technical Specifications to reflect the title change from Plant Superintendent to Station Manager: 6.1-1 through 6.1-4, 6.2-1 and 6.3-1.

On page 6.2-1, Section 6.6.4 has been eliminated. However, the requirements of this Section are in Section 6.6.2.1 which remains unchanged.

8009050 555

The following changes to the station organization chart have been proposed:

1. The title of Plant Superintendent will be changed to Station Manager.
2. The position of Assistant Plant Superintendent will be eliminated.
3. Clerical Staff and Visitor Center Staff will be removed from the chart.
4. The supervisor's titles in the two service groups and the operating group will be changed from Engineer to Superintendent.

The proposed change in the management organization chart (Figure 6.1-2) will simplify the reporting channels for the Safety Review Committee and the Station Review Committee.

The organization and titles incorporated in the proposed change will be standard for all Duke Power Company nuclear stations.

Evaluation

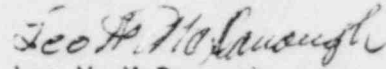

In reviewing this proposed change, the staff found that it dealt mainly with title changes and the elimination of; redundant requirements, multiple reporting channels and non-operational groups. The elimination of the position of Assistant Plant Superintendent is compensated for by eliminating non-operational responsibilities, upgrading the supervisory positions in the Service and Operation groups, and shortening the authority chain between the Station Manager and the operating personnel.

The staff has concluded that this proposal does not involve a substantive change in the Oconee Station organization and strengthens the review and audit functions within the licensee's management organization. The resulting organizational structure is acceptable and consistent with the criteria of ANSI 18.1.

Conclusion

We have concluded, based on the reasons discussed above, that the authorization of these changes does not involve a significant hazards consideration. We also conclude that there is reasonable assurance (i) that the activities authorized by these amendments can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted

in compliance with the Commission's regulations and the issuance of these amendments will not be inimical to the common defense and security or to the health and safety of the public.

UNITED STATES ATOMIC ENERGY COMMISSION

DOCKET NOS. 50-269, 50-270 AND 50-287

DUKE POWER COMPANY

NOTICE OF ISSUANCE OF AMENDMENTS TO FACILITY
OPERATING LICENSES

Notice is hereby given that the U. S. Atomic Energy Commission (the Commission) has issued Amendments No. 4, 4 and 1 to Facility Operating Licenses No. DPR-38, DPR-47 and DPR-55, respectively, issued to Duke Power Company which revised Technical Specifications for operation of the Oconee Nuclear Station, Units 1, 2 and 3, located in Oconee County, South Carolina. The amendments are effective as of the date of issuance.

These amendments incorporate in the Oconee Technical Specifications the organizational position titles which will be standard for all Duke Power Company nuclear stations.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments.

For further details with respect to this action, see (1) the application for amendments dated August 19, 1974, (2) Amendments No. 4, 4 and 1 to Licenses No. DPR-38, DPR-47 and DPR-55, respectively, with
