SAFETY EVALUATION BY THE DIRECTORATE OF LICENSING

SUPPORTING AMENDMENTS NO. 2

CHANGE NO. 12 TO TECHNICAL SPECIFICATIONS FOR FACILITY LICENSE NO. DPR-38

CHANGE NO. 7 TO TECHNICAL SPECIFICATIONS FOR FACILITY LICENSE NO. DPR-47

DUKE POWER COMPANY

OCONEE NUCLEAR STATION UNITS 1 AND 2

DOCKET NOS. 50-269 AND 50-270

INTRODUCTION

By letter dated May 29, 1974, Duke Power Company proposed a change to the Oconee Nuclear Station, Units 1 and 2 Technical Specifications. The proposed change involves restructuring and adding supervisory positions in the station organization.

DISCUSSION

The significant changes in the station organization in this proposal are as follows:

- (1) Instrument and control personnel will be moved from the Technical Support Group and will report to an Instrument Engineer who in turn will report to the Maintenance and Instrument Engineer.
- (2) Health physics personnel will report to a Health Physics Supervisor and chemistry personnel will report to the Station Chemist. Both supervisors will report to the Technical Support Engineer. At present, chemistry and health physics personnel report to the same supervisor.

The supervisory and professional personnel who will fill the positions shown in the revised organization chart will meet the training and experience requirements described in Sections 4 and 5 of ANSI 18.1.

8009050 560

EVALUATION

This proposed change provides for a separation of the maintenance and support personnel as to function and assigns a supervisor to each function. The professional personnel to whom these supervisors report are also assigned along functional lines. The additional supervisors provided for in this change will serve to strengthen the supervision and administration of the Oconee Nuclear Station, particularly with regard to maintenance activities.

CONCLUSION

The staff concludes that: (1) the change does not involve a significant hazards consideration since it does not involve a substantial increase in the probability or consequences of accidents previously considered and does not involve a substantial decrease in the margin of safety; and (2) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner.

UNITED STATES ATOMIC ENERGY COMMISSION

DOCKET NOS. 50-269 AND 50-270

DUKE POWER COMPANY

NOTICE OF ISSUANCE OF AMENDMENTS TO FACILITY LICENSES

Notice is hereby given that the U.S. Atomic Energy Commission (the Commission) has issued Amendments No. 2 to Facility Operating License Nos. DPR-38 and DPR-47 issued to Duke Power Company (the licensee) which revised Technical Specifications for operation of the Oconee Nuclear Station, Units 1 and 2, located in Oconee County, South Carolina. The amendments are effective as of date of issuance.

The amendments permit a change to the station organization in the technical support and maintenance areas.

The application for the amendment complies with the standards and requirements of the Act and the Commission's rules and regulations and the Commission has made appropriate findings as required by the Atomic Energy Act of 1954, as amended, and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

For further details with respect to this action, see (1) the application for amendment dated May 29, 1974, (2) Amendments No. 2 to License Nos. DPR-38 and DPR-47, with any attachments, and (3) the Commission's related Safety Evaluation. All of these items are available
