COMMUNICATIONS SECTION

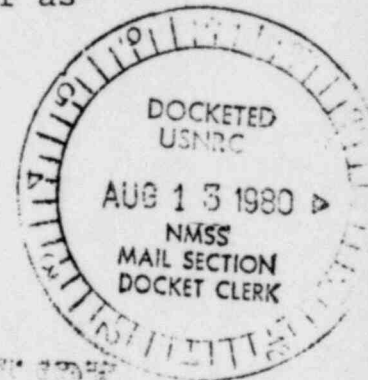

Dear Mr. Crow:

UNC Recovery Systems has, as indicated in the July 30, 1980 meeting at the Rhode Island State House, engaged the services of a consulting firm to evaluate information at our Wood River Junction site. Based on this evaluation, we have asked the consultants to identify what they feel would be the optimum placement and depth of a test well to best categorize the contamination profile and provide maximum information for subsequent efforts. The consultant we have engaged is the firm of Goldberg-Zoino and Associates, Inc., 293 South Main Street, Providence, RI 02903. Their phone number is (401) 421-4140 and the principal contact is Mr. Michael A. Powers, P.E.

We would like to request your cooperation with them, should they contact you for information or other assistance.

Very truly yours,
UNC RECOVERY SYSTEMS
