General Electric Company
 Vallecitos Nuclear Center
 ATTN: Mr. G.E. Cunningham
 Sr. Licensing Engineer
 P.O. Box 460
 Pleasanton, CA 94566

Gentlemen:

This is in response to your letters dated May 30, 1980, which transmitted page changes to the GE-VNC FINC Plans for Plant 1.

We have determined that all but one of these changes are in accordance with the provisions of 10 CFR 70.32(c) in that they do not decrease the effectiveness of your material control and accounting program, and that approving these changes will not endanger the common defense and security and is otherwise in the public interest. The change which we do not agree with was discussed with Mr. R. A. Moschner of your staff on July 16, 1980, and he agreed to accept a license condition which would correct this situation. In addition, the exact wording of this new license condition was discussed with Mr. Moschner on July 22, 1980, and consensual agreement concerning the acceptability and wording of this condition was reached. Accordingly, effective immediately, we are adding License Condition 1.1 and modifying License Condition 2.1 of Amendment No. MPP-2 to your License No. SNM-960, as reflected in the enclosure to this letter.

We have determined that the attachments to your letters dated May 30, 1980, contain information of a type specified in 10 CFR 2.790(d). Accordingly, pursuant to Section 2.790(d)(1), such information is deemed to be commercial or financial information within the meaning of 10 CFR 2.5(a)(4) and shall be subject to disclosure only in accordance with the provisions of 10 CFR 2.12.

Sincerely,

James G. Partlow, Chief
 Material Control and Accountability
 Licensing Branch
