SACRAMENTO MUNICIPAL UTILITY DISTRICT □ 6201 S Street, Box 15830, Sacramento, California 95813; (916) 452-3211

July 30, 1980

Mr. R. H. Engelken, Director  
Region V, Office of Inspection  
and Enforcement  
U.S. Nuclear Regulatory Commission  
Suite 202, Walnut Creek Plaza  
1990 North California Boulevard  
Walnut Creek, CA 94596

Docket 50-312  
Rancho Seco Nuclear Generating  
Station, Unit No. 1  
IE Bulletin 79-03A  
Longitudinal Weld Defects in  
ASME SA-312 Type 304,  
Stainless Steel Pipe

Dear Mr. Engelken:

The District's original response to this bulletin was dated April 16, 1979. This response concluded that no ASME SA-312, Type 304, stainless steel pipe was used in safety related systems at Rancho Seco.

The records have been reviewed again. This review confirmed that there has been no ASME SA-312, Type 304, stainless steel pipe used in safety related systems. In addition, there are no plans to use SA-312 pipe in safety related applications.

If you have any questions, please contact Larry Smith on (916) 452-3211, extension 621.

Sincerely,

*John J. Mattimoe*  
John J. Mattimoe  
Assistant General Manager  
and Chief Engineer
