Trojan Nuclear Plant
Docket 50-344
License NPF-1

Mr. D. G. Eisenhut
Acting Director
Division of Operating Reactors
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Sir:

On July 2, 1980, the NRC issued model Technical Specifications to all PWR licensees with regard to implementation of the TMI-2 Lessons Learned Action Items (NUREG-0578) and requested the submittal of a license amendment application to incorporate the model Technical Specifications. Because of the scope of the requested Technical Specification changes and the considerable amount of work relating to the Lessons Learned Action Items, a review and consideration of the NRC model Technical Specifications has not been completed. PGE will submit the subject License Change Application by November 3, 1980.

PGE is a member of the Westinghouse Owners Group and had expected to pursue the application of these proposed Technical Specifications on a generic basis through that organization. However, members of the group did not consider it effective to support this effort on a generic basis.

Unless we hear otherwise, we will proceed with this approach.

Sincerely,

C. Goodwin, Jr.
Assistant Vice President
Thermal Plant Operation and
Maintenance

CG/KM/sa/4hn8A15

c: Mr. Lynn Frank, Director
State of Oregon
Department of Energy

Mr. Robert A. Clark, Chief
