Operations' letter, C. E. Bowers to R. F.
Barnett; dated December 2, 1977

Dear Mr. McCorkle:

In Attachment I to the referenced letter, this facility
agreed to change the number of guards on "off-shifts"
or convert to round-the-clock production operation.
Present decommissioning plans include round-the-clock
operation of the Lagoon Processing Facility with six
to seven days a week being a distinct possibility.

It is our understanding that the operation of the Lagoon
Processing Facility equates to production operation and
that the commitment to modify the guardforce during "off-
shifts" does not exist during periods the Lagoon Proces-
sing Facility is operating.

The new guardforce levels are expected to be implemented
on July 7, 1980.

Sincerely,

C. E. Bowers
President
