

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

August 26, 1980

Docket No. 50-382

APPLICANT: Louisiana Power & Light Company  
FACILITY: Waterford Steam Electric Station, Unit No. 3  
SUBJECT: SUMMARY OF MEETING HELD ON AUGUST 13, 1980, TO DISCUSS  
THE STATUS OF THE APPLICATION

A meeting was held at the NRC offices in Bethesda, Md., to discuss the status of the application for an operating license for the subject facility. The purpose was to discuss potential problem areas in completing the project. A list of attendees is enclosed (Enclosure 1).

The following areas were discussed.

1. Review Schedule including the current status of the review, staff plans for the remaining review, possible ways to shorten the review, and the schedule between the Safety Evaluation Report and the Operating License.
2. Construction Schedule
3. TMI Requirements
4. Organization to support plant operation
5. Financial situation at LP&L
6. Priorities of staff project manager.

The following are considered to be the principal conclusions reached at the meeting.

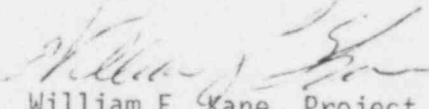

1. Review Schedule - Round one requests are complete except for the electrical and structural areas. Round two requests are scheduled for late December 1980 with the SER targeted for June 1, 1981. The SSER is targeted for mid-September 1981. The DES and FES are scheduled for March 1981 and August 1981, respectively. The staff agreed with the applicant that based on standard assumptions a period of about 17 months would be required between SER and OL.

A

August 26, 1980

2. Construction Schedule - The applicant stated that the current schedule for completion of construction is July 1982. They noted that their recent delay was an attempt to have their construction schedule coincide with the staff's licensing schedule.
3. TM1 Requirements - The staff urged the applicant to respond to NUREG-0694 requirements as soon as possible to permit review to begin.
4. Organization - The staff noted that it would work with LP&L to set up a meeting to review their organization for operation. It was suggested that the meeting be held at the LP&L offices and the plant for the most effective results.
5. Financial - The staff's plans are to include the financial evaluation in the final supplement to the SER. The applicant should advise the staff if an earlier evaluation is needed and provide the basis.
6. Priorities of Staff Project Manager - The staff's project manager for Waterford is currently working on an application that has a higher priority. The staff will look at ways to assure that the Waterford application is not adversely affected.

  
William F. Kane, Project Manager  
Licensing Branch #2  
Division of Licensing
