NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY
OPERATING LICENSE
AND TERMINATION OF ORDER FOR MODIFICATION OF LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 28 to Facility Operating License No. DPR-66 issued to Duquesne Light Company, Ohio Edison Company, and Pennsylvania Power Company (the licensees), which revised Technical Specifications for operation of the Beaver Valley Power Station, Unit No. 1 (the facility) located in Beaver County, Pennsylvania. The amendment is effective as of the date of issuance.

The amendment revises the Technical Specifications to reflect changes as a result of modifications made to alleviate Net Positive Suction Head (NPSH) problems with the Low Head Safety Injection and Recirculation Spray Pumps. This amendment also constitutes completion of actions required of the licensee by the "Order for Modification of License" dated September 30, 1977; that Order is therefore terminated.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Notice of issuance of the Order for Modification of License was published in the Federal Register on October 25, 1977 (42 FR 50034).
