U.S. Nuclear Regulatory Commission
Dept. of Exports
Washington D.C. 20555

Attention: Miss Elaine Henby

RE: Application for License to
Export DEUTERIUM OXIDE
Your Ref. No. XMAT 0088

Dear Miss Henby:

With reference to our today's phone conversation we understand that respective Export License covering 2,250 lbs. of Deuterium Oxide for account of E. Merck Darmstadt, West Germany has been approved and submitted to you by the Executive Branch of the State Department, Mr. Robin Delabar.

You further indicated that the U.S. Nuclear Regulatory Commission is requiring another review before your Export License will be issued and released. Since the material is of hazardous nuclear nature we kindly request you to trace this matter in order to enable us to effect shipment at convenient whether conditions. Please understand that we have to run against time due to the possibility of the heavy water freezing.

Miss Henby, we would highly appreciate your assistance in this matter and are looking forward to hearing from you soon.

Cordially yours,

GEORGE UHE CO., INC.
