DOCKET NO. 50-346

THE TOLEDO EDISON COMPANY

AND

THE CLEVELAND ELECTRIC ILLUMINATING COMPANY

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY
OPERATING LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued

Amendment No. 31 to Facility Operating License No. NPF-3, issued to The

Toledo Edison Company and The Cleveland Electric Illuminating Company (the

licensees), which revised the Technical Specifications for operation of the

Davis-Besse Nuclear Power Station, Unit No. 1 (the facility) located in Ottawa

County, Ohio. The amendment is effective as of its date of issuance.

This amendment modifies Limiting Conditions for Operation for the Containment Purgo and Exhaust Isolation Valves. This action allows the plant, which is in cold shutdown, to heatup and operate at power with these valves inoperable, provided that the containment purge penetrations have been rendered passive by completing Action statement b. or c. of Technical Specification 3.6.3.1.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR §51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated August 22, 1980, (2) Amendment No. 31 to
License No. NPF-3, and (3) the Commission's related Safety Evaluation. All
of these items are available for public inspection at the Commission's
Public Document Room, 1717 H Street, N. W., Washington, D. C., and at
the Ida Rupp Public Library, 310 Madison Street, Port Clinton, Ohio. A
copy of items (2) and (3) may be obtained upon request addressed to the
U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention:
Director, Division of Licensing

Dated at Bethesda, Maryland, this 8th day of September 1980.
