C. E. MacDonald, Chief
Transportation Certification Branch
Division of Fuel Cycle and Material Safety
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Ref: Certificate of Compliance No. 9049

Dear Mr. MacDonald:

The General Electric Company, Vallecitos Nuclear Center (VNC), requests that Certificate of Compliance No. 9049 for the G.E. Model 500 shipping container be modified to read:

5.(b) Contents

(1) Type and form of material

- (i) Byproduct material meeting special form requirements of 10 CFR 571.4(c); or
- (ii) Solid non-fissile irradiated metal hardware or other solid non-fissile material provided it is contained in metal cladding.

The basis for this amendment is the fact that the requested materials cannot readily disperse under the postulated accident conditions.

A check for \$150.00 for the amendment fee is enclosed.

Sincerely,

G. E. Cunningham
Senior Licensing Engineer
