Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NOS. 50-325/89-38 AND 50-324/89-38)

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by P. A. Taylor and A. J. Szczepaniec on October 16-20, 1989. The inspection included a review of activities authorized for your Brunswick facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed Inspection Report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

The Diagnostic Evaluation Team Report (dated August 2, 1989) findings were reviewed during this inspection for enforcement actions. The review of these findings indicate that certain activities appeared to violate NRC requirements and are identified in the enclosed Notice of Violation. Your letter to the NRC dated September 27, 1989, provided actions planned to resolve these findings. Your resolutions were found to be satisfactory; therefore, no further response is required.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
