Gentlemen:

Subject: NRC Resident Inspection 50-213/89-16 (September 6 - October 17, 1989)

This transmits the findings of the routine, resident inspector, safety inspection conducted by Messrs. J. T. Shedlosky and A. A. Asars at the Haddam Neck Plant. At the conclusion of the inspection, these findings were discussed with Mr. D. B. Miller and Mr. G. H. Bouchard of your staff.

We note the prudent management decision to delay reactor disassembly in response to high reactor coolant system activity. Appropriate consideration was given to ALARA controls and personnel safety, even though the delay impacted the outage schedule.

Your cooperation with us is appreciated.

Sincerely,
