

November 20, 1989

Docket No. 50-219

Mr. E. E. Fitzpatrick
Vice President and Director
Oyster Creek Nuclear Generating Station
Post Office Box 388
Forked River, New Jersey 08731

Dear Mr. Fitzpatrick:

SUBJECT: SAFETY EVALUATION REGARDING THE PROCEDURES GENERATION PACKAGE FOR
OYSTER CREEK NUCLEAR GENERATING STATION (TAC NO. 44324)

The staff has reviewed GPU Nuclear Corporation (GPUN) submittals dated July 29, 1983 and October 31, 1985 transmitting GPUN's Procedures Generation Package (PGP).

As a result of our review the staff finds that the program described in these submittals is deficient in some respects. These deficiencies if not corrected will impair the ability of GPUN to develop and maintain high quality Emergency Operating Procedures. The staff's findings are discussed in detail in the enclosed Safety Evaluation (SE). The staff requests that GPUN revise its PGP to reflect the concerns identified in the SE. No further submittals are required. NRR or Region I will confirm that all items described in the report have been adequately resolved by appropriate GPUN action or justification of items GPUN deems inappropriate for inclusion in its PGP in the course of routine or special inspections. This closes out TAC No. 44324, and the staff's review of this issue.

Sincerely,

Alexander W. Dromerick
Alexander W. Dromerick, Senior Project Manager
Project Directorate I-4
Division of Reactor Projects -I/II
Office of Nuclear Reactor Regulation
